## EDUCATION

---

|                                                                                                                                                      |                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>University of Illinois Urbana Champaign, Urbana, IL, USA</b><br>Ph.D. Candidate in Physics, Quantum Information Science, Condensed Matter Physics | <i>Aug. 2024–present</i>   |
| <b>University of Illinois Urbana Champaign, Urbana, IL, USA</b><br>M.Sc. in Physics (August 10th)                                                    | <i>Aug. 2024–Aug. 2026</i> |
| <b>University of California Riverside, Riverside, CA, USA</b><br>Undergraduate Extension Program in Physics (no degree)                              | <i>Sep. 2023–May 2024</i>  |
| <b>Lanzhou University, Lanzhou, Gansu, China</b><br>B.Sc. in Theoretical Physics (June 18th)                                                         | <i>Sep. 2020–June 2024</i> |

## EMPLOYMENT HISTORY

---

|                                                                                           |                            |
|-------------------------------------------------------------------------------------------|----------------------------|
| <b>Westlake University, Hangzhou, Zhejiang, China</b><br>Undergraduate Research Assistant | <i>July 2023–Sep. 2023</i> |
| <b>Quantum Computing Inc., Hoboken, NJ, USA</b><br>Entropy Quantum Computing Intern       | <i>June 2025–Aug. 2025</i> |

## PUBLICATIONS

---

1. Y. Song, Z. Liu, Z. Wang, J. Y. Lee, B. Shi (2026),  
“*Approximate Quantum Error Correction at Chiral Topological Edges*” arXiv:2608.06258

## SCIENTIFIC PRESENTATIONS

---

|                                                                                                                                      |                      |
|--------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Chalk talk, Michigan State University, East Lansing, MI, USA                                                                         | Oct. 13 and 20, 2026 |
| <i>Approximate Quantum Error Protection with Chiral Topological Order Edges</i> , APS<br>Global Physics Summit 2026, Denver, CO, USA | Mar. 17, 2026        |

## CONFERENCES AND WORKSHOPS

---

|                                                 |                  |
|-------------------------------------------------|------------------|
| APS Global Physics Summit 2026, Denver, CO, USA | Mar. 15–20, 2026 |
|-------------------------------------------------|------------------|

## SUMMER/WINTER SCHOOLS

---

|                                                        |                  |
|--------------------------------------------------------|------------------|
| Numerical Methods in QIS 2026, UMASS, Amherst, MA, USA | June 21–27, 2026 |
|--------------------------------------------------------|------------------|

## TEACHING & GRADING

---

|                                                                                    |             |
|------------------------------------------------------------------------------------|-------------|
| Quantum Mechanics I (Grad, PHYS 580) with Prof. Thomas Faulkner, UIUC              | Fall 2026   |
| TA of Ph.D. Qualifying Examination in Physics, UIUC                                | Summer 2026 |
| Mathematical Physics II (Grad, PHYS 509) with Prof. Michael Stone, UIUC            | Spring 2026 |
| Classical Electromagnetism (Grad, PHYS 505) with Prof. Peter Abbamonte, UIUC       | Fall 2025   |
| Classical Mechanics II (Undergrad, PHYS 326) with Prof. Ido Golding, UIUC          | Spring 2025 |
| Electromagnetic Fields I (Undergrad, PHYS 435) with Prof. Benjamin Hooberman, UIUC | Fall 2024   |
